

Accion Fraterna

1102 030 Ramanarayanamma - Biogas Unit ID 2650

Ramanarayanamma lives in Nidigallu village. She and her husband have a small dairy setup by which they earn upto Rs 10,000 a month when all their cows lactate. Ramanarayanamma use to spend a lot of time collecting fuelwood, cleaning blackened vessels and cooking food on a traditional stove with lots of smoke. After doing all this she use to help her husband milk the cows and clean her home. She had absolutely no time for herself.

One day she came to know about the Accion Fraterna Biogas Project supported by IndiGo passengers. At first, she didn't believe that she could cook without fuelwood and smoke. But the Case worker convinced her to come forward.

Today she cooks in less hours, doesn't have to bother about collecting firewood, and doesn't have to force her daughter Hemlatha to do household chores. Hemlatha has started

stitching clothes and earns Rs 150-200 a day.

Ramanarayanamma has opened a small shop and sells day to day needs to the local people. Her family earning has gone up.

Ramanarayanamma is happy that her daughter is becoming self dependent and also contributing to the family financially. She believes that this Biogas Program is surely going to change many people's lives as it has changed hers.
